Ex no: 5 Expt: 05 Experiments on Packet Capture tool Wiresharks
10.8.26

aim: Experiment on packet capture tool wiresharks

Wiresharks:

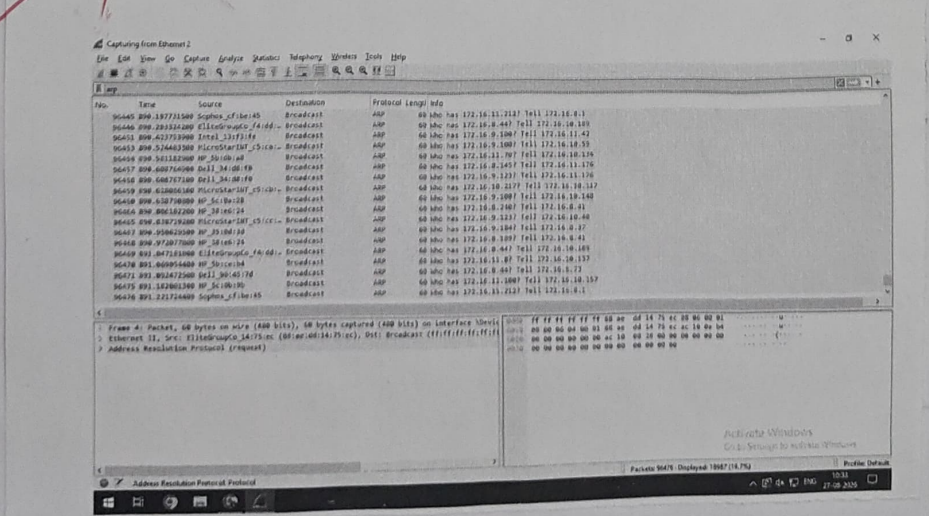

Wiresharks is a network analysis tool formerly known as Ethereal, captures packet in real-time and display them in human readable format. Wiresharks includes filters, color coding and other features that let you dig deep into network traffic and inspect individual packets.

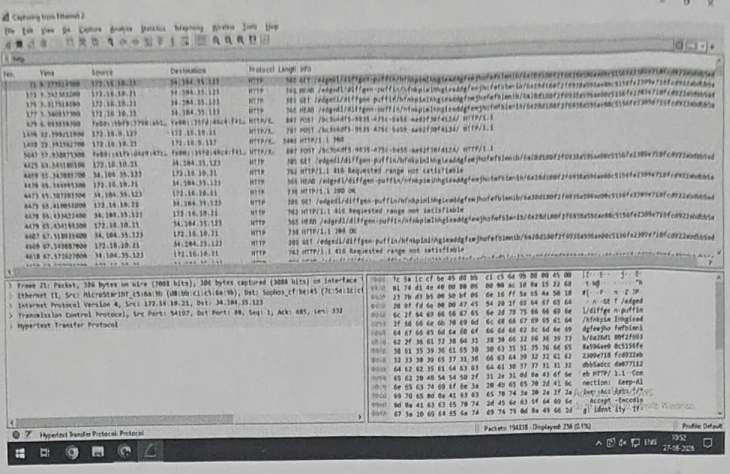

Capturing packets:

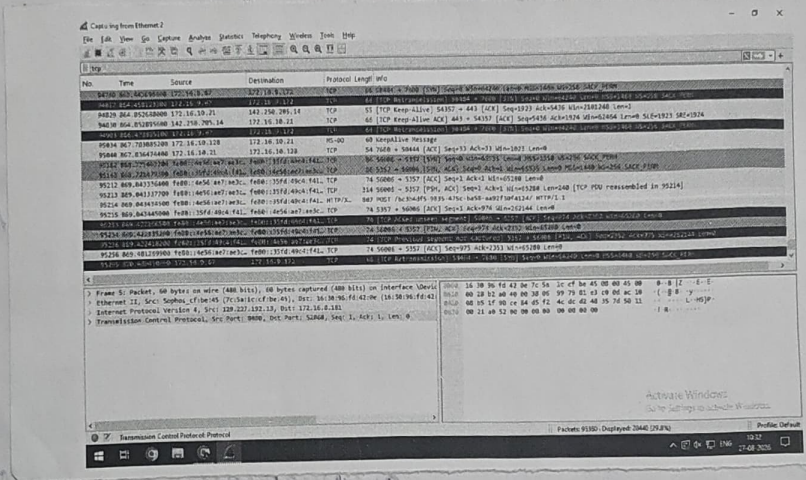

⇒ After downloading & Installing wiresharks, launch it and download it.
⇒ Select local area connection in wiresharks
⇒ Go to capture option
⇒ Select stop capture automatically after 100 packets
⇒ Save the packets

Filtering packets:

⇒ Go to capture option
⇒ Select stop capture automatically after 100 packets
→ Then click start capture
⇒ Search ARP packets in search ~~box~~ bar
⇒ Save the packet.

Result : Capturing & filtering of packets using wireshark is done successfully.
